Please Read - Important Inflatable Notes - Please Read

Loading, Transporting and Unloading.

Please remember that it is the patron's responsibility to load and unload equipment for services rendered. A full size, open bed pickup truck and a minimum of 2 people capable of lifting 150lbs each are required for pick-up and return of our larger items. Inflatables are very heavy! The units we offer weigh between 200 and 530 lbs.

Cleaning.

Frequently, other customers that have reserved an inflatable for their special event are picking up the same unit that you are returning. Please return it in the condition that you would like to receive it in. If your jumper is returned excessively dirty, you will be contacted to pay a cleaning fee. Cleaning fees are equivalent to one additional rental day.

The Use of Silly String is Strictly Prohibited.

Silly String cannot be used in, on or around any inflatable because it chemically bonds (like glue) to any vinyl surface. The inflatables are made of vinyl. Silly String removal could cost you hundreds of dollars.

Return Times.

Customers that have reserved an inflatable for their special event are allowed to pick up that item when the facility opens. Frequently, they are picking up the unit that you are returning. Please make certain your plans include the prompt return of *their* inflatable.

Inflatables Must Not Get Wet.

If the unit is to be used in an area with automatic sprinklers make certain the system has been shut OFF at least one full day prior to and on the day of your event. The setup area must be dry. Wait until dew has evaporated before setting up; take down and secure indoors before it settles on the unit. Please store inflatables indoors overnight.

*Do not allow jumpers to get wet. Wet jumpers require two days of drying time.

If you return a jumper wet, you will be charged an additional two days of rental fees.

*Does not apply to wet slides.

Your understanding and compliance
with these matters are greatly appreciated.

- Thank You!
